11. If you have any suggestion for improving syllabus, please state here.

10 responses

No suggestions

Company Interview mock should be taken in the 5 semester, this will help students to learn how to express themselves in the company interview!

Pls include detailed syllabus along with that trending technologies in it.

Teacher must teach some high level concepts with numericals. Numericals are integral part of any subject

Syllabus is too outdated as per today's standards in corporates for developers. The pattern of Assignments and exams are also not so good. Full department of Computer Science needs to look upon thoroughly.

Need to upgrade the syllabus based on current market. Needs a lot of emphasis on making students job ready.

Please add the subject which the students to think logically and enhance their logical thinking

i think college should add GEN Ai, analytics, devops and product management in there syllabus. not in theory but in practical ways. and student should have liberity to choose the extra papers like this accordingly to there interest apart of the current syllabus

Therotical knowledge is gained through the syllabus but need to include more practical oriented knowledge sharing method.

Should be more relevant to current trend and there should be more focus on practicals and projects.
