10. If do you have any suggestion for improving our syllabus, please state here

357 responses

No

Nothing

No suggestions

None

Syllabus are good

No

NO

No suggestion

It's good

Provide us notes in both the languages.

All good

Syllabus is excellent

No suggestion

Good

Main focus should be on Indian History.

All is good.

Very effective learning

It can be more effective and interesting

As per new trends and requirements, syllabus must be very practical and assignment based

Syllabus should be taught in sequence according to the syllabus

It is good

It's fine

One teacher should be allotted for that entire cc paper to be explained.

Give proper syllabus

Teach students in a easiest way.

The syllabus should cover some field work for real life experience.

Syllabus can be improved by more practical classes than the theory class as our course is a vocational course so we will need more of practical knowledge than the theory. I know that theory is also important but i prefer more of practical knowledge for my betterment of understanding about my subjects. Teachers should also use the projectors which are installed in our classes for our better understanding during their lectures.

Overall syllabus is good.

It would be better if Xavier's would have its own syllabus

Nothing

Provide basic and detailed information about syllabus and keep the syllabus flexible

I have none.

Reduce MDC and vac syllabus because it is too vast and the teachers are rushing to complete the course.

The syllabus is okay

Make it a lil more advance and add more to it.There is just little to learn .

Syllabus should be design in more analytics way rather just remembering and spiting in exams

Syllabus is good

All syllabus are good

Adding topics related to current scenario

Its perfect

No, all things are good

Invite professional from field to share their experience . Conduct workshop.

Everything is fine

Everything's Alright

To better improve study quality

Keep skill oriented , employability in future, eradicate dates, past and history that is of no use in acquiring job and earning money in future. There is a lot of dates that we are asked to keep

remember but upgradation is needed here. It is nonsense to keep it remember. Change Sociology GE teacher she is not completing syllabus on time and can't clear concepts at all. Nobody can understand her but when asked they will be scared to tell frankly. ,

Let students choose the subject in cc5

Add more topics that are important to us.

The college should soon implement the autonomous syllabus as the RU syllabus is repetitive and of no use to our further competitive exams.

The syllabus are ok but subject are not according to our background.As we are from commerce background so mainly those subjects should be studied which are from our background.But we have to study the subjects like Pol. sci. as IRC and others which are not of commerce subjects.

Excellent

No suggestions

Syllabus should be more detailed

The syllabus is too lengthy and it's not beneficial for employment opportunities

.

It can be more clear as by topic wise that's it . Rest there is nothing other need for improvement in syllabus.

In syllabus more practical things should be included.

Shorten the syllabus a bit

I don't have any suggestions

Confirmation of syllabus either we'll continue with RU or AUTONOMOUS

Some topics should be included for discussion that built different ides in the student . Some ethics relted topic should be there . That may help the student to compete with the outer world

There is an urgent need to remove Shubham Ankit Kujur Sir from the department.

No thanks

Every thing is good but Educational/field tour should be organised.

No, syllabus is ok.

It should be prepared according to current requirements and it should be qualitative instead of being quantitative

Our syllabus are nice

The study of syllabus could be more practical

The institute should focus on the syllabus mainly related to the field of the major paper of the students rather than giving them a load of various other subjects which is having no relation and coordination with the major paper of the students so that the students can excel better in the field of their research and major paper and they can get a deep and broad knowledge of the same.

By Providing real-world examples such as Incorporating real-world examples and case studies to illustrate the application of the concepts in the classroom. This will help students see the relevance of the material and make it easier for them to relate and apply the concepts in their professional lives.
