PROJECT 1 : THE CURIOUS CASE

Date: 8th August 2026

Place: Fr. Proost Hall

INTRODUCTION

The Science Club of St. Xavier's College, Ranchi, organized "The Curious Case" an engaging science-based competition designed to test the participants' scientific reasoning, observation, creativity, classification skills, and memory. The competition consisted of five rounds, with elimination rounds in between.

FLOW OF EVENT

The first round, "Do or Die" was a situation-based survival questionnaire in which teams were given limited time to analyze and answer survival-related questions. This round provided participants with an opportunity to demonstrate their presence of mind and decision-making abilities.

PROJECT 1 : THE CURIOUS CASE

The second round was a Visual Round, where teams were presented with images depicting various scientific phenomena and were required to identify them within the given time.

The third round, "Scribble" involved identifying and classifying a group of objects. One member of each team had to draw the given concept while the remaining members attempted to identify it within the allotted time.

The fourth round, "Classification" challenged participants to guess the relation. Teams were required to determine the common connection between the given objects, making the round a test of logical thinking and scientific classification.

The final round, "Memory Test" was the most interesting part of the event as it focused on the participants' memory and concentration. Teams were presented with sets of numbers that they had to remember before answering the associated questions.

CONCLUSION / OUTCOME

Through "The Curious Case" the Science Club provided students with an interactive platform to apply scientific knowledge beyond conventional classroom learning. The event encouraged scientific curiosity, critical thinking, observation, teamwork, creativity, quick decision-making.

INTRODUCTION

The Science Club of St. Xavier's College, Ranchi, organized a recruitment drive to welcome enthusiastic and motivated students interested in science, innovation, creativity, and collaborative learning.

AIM

The recruitment process encouraged students from different academic backgrounds to participate and explore their interests beyond the conventional classroom environment. The initiative aimed to introduce students to the activities and objectives of the club while providing them with an opportunity to become an active part of its diverse and dynamic community.

CONCLUSION

The recruitment drive served as an effective platform for building a new and diverse team of students who can contribute fresh ideas and perspectives to The Science Club.
